Konark

Rein in your Runaway Resources

*i*TWINE Technologies, with its rich domain knowledge of discrete manufacture, has come up with a Manufacturing Resource Management System. Named Konark, this MRM solution helps intertwine not just suppliers and manufacturers but also all the enterprise-wide functions. Leading to lean manufacture, reduced raw material, semi-finished inventory as also WIP.

Weren't you looking for an affordable and easy to implement solution that would improve efficiencies all around your plant, not to mention bolster your bottom-line?

Konark

Rein in your Runaway Resources

Let Konark go to work for you

Konark, the MRM System from *i*TWINE, helps you zero in on one of the most vexing problems that you are likely to face in your manufacturing unit… Cost Control.

Konark is designed to arm you with timely information to enable you to take quick, decisive actions in your daily operations. Right there, on the fly! This power, in turn, means that you can effectively control costs at every stage of operation. And bring efficiencies all around. A real boon in these highly competitive times.

Konark makes sure all are on the same page

Just-in-Time, Lean Manufacturing Systems, Kaizen and other quality and efficiency enhancing philosophies operate best only in an environment where your Supply Chain is in complete sync with your manufacturing operations. Konark is such a solution that does just that. And how!

By straddling all functions right from receipt of Field Order to its execution and Shipping. And everything in between. Such as Sales & Marketing, Production Planning, Materials Management, Stores & Inventory and Shop Floor Operations. It also connects all vendors and customers to this common enterprise-wide system, bringing about precision planning, better transperancy and greater collaboration.

Konark boosts your bottom line

▸ Reduction of waste in raw material, semi-finished and finished inventory, WIP and machining time
▸ Improved production efficiencies and throughput
▸ Greater visibility for product costing
▸ Better on-time / due-date adherence
▸ Improved 'capacity to promise'

Just look at the technology that powers Konark

▸ Web based, n-tier application for greater accessibility and flexibility
▸ J2EE compliant, component based architecture for high reliability and scalability
▸ Proven design patterns and framework for loose coupling of components for easy customization

Affordable & Least Disruptive

The best part of Konark, as the most ideal Manufacturing Management Solution for your unit, is that it is designed keeping in mind a business like yours. Business that must go on uninterrupted while Team *i*TWINE studies your needs and customizes Konark just for you. And implement it without disrupting your day-to-day operations. More importantly, *i*TWINE believes that the solution must also be affordable. Not just in terms of its initial price, but also in terms of cost of installation and implementation. In other words in terms of its Total Cost of Ownership.

Management Dashboards - Information at your Fingertips

Konark's query-based engine means instant answers to tricky questions that the top management must ask to check if any unplanned event is likely to take place. And then go about quickly to take the necessary corrective action.

With Management Dashboards from the usual Sales, Production and Inspection reports to deviation alerts like a possible 'stock out' for a particular machine, means your finger is right there on the pulse. Twenty-four by seven!

Production Line down due to material shortage

Material reorder level reached for Part #1102

High-value Sales Order Pending
